

Company Profile

Technical Resources Corporation was founded in 1993 by Frank Mascetti, after serving the electronics industry in Florida and Puerto Rico since 1981 with such firms as Westinghouse, Racal-Milgo, Tektronix, and GenRad. TRC maintains a "value-added" approach to providing **total solutions** for electronics manufacturing, test, in-process inspection and repair of electronic assemblies.

We'd like to share our philosophies with our customers:

- Know our customer's unspoken needs: **"listen to what they want...deliver what they need"**

- Provide our customers with the highest quality products and services available at cost-effective pricing, through our knowledge-based decisions.

- Provide synergistic and complimentary product offerings, thus providing **"total solutions"**

- Understand our role in our customers' organizational chart: "vendor", "supplier", "consultant"...a **"technical resource"**

The combined resources in our corporation provide over 100 years of combined experience serving the electronics industry in Florida and Puerto Rico. Now, these **technical resources** are available to you!
